

HOW TO APPLY MAGICWALL PANELS

1. Unpack your panels and place them flat on the floor. Best is to wait few or 24 hours to return to their shape and let them “breathe”.

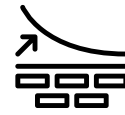

2. Before applying panels on the wall prepare a sharp blade or wallpaper knife, spirit level, yardstick.
Measure the wall or ceiling carefully and mark some points and lines auxiliary.
Make some trials.

3. If necessary you can easily cut the panel on the flat surface using a sharp knife and spirit level.

4. Before fixing your panel to the wall remove carefully yellow paper at the back of each panel. Always watch your fingers, this surface is strongly sticky.

5. Good tip: before fixing your panel on the wall spray water firstly on the wall and additionally on the sticky surface of the panel. This will enable removing panels from the wall several times.

6. Apply panels according to ordered pattern, vertically or horizontally with or without a break between panels.

Enjoy fast and easy assembly of MagicWall panels. Enjoy your new walls and beautiful interior.
